6.2.1 The institutional Strategic/ perspective plan is effectively deployed

Describe one activity successfully implemented based on the strategic plan within a maximum of 200 words.

The institutional strategic/perspective plan is prepared for every academic year and is approved. This plan is effectively deployed in order to satisfy the vision and mission of the institute. In the academic year, even though the pandemic was there and we have limitations, but still the stakeholders strived best in achieving the desired outcomes of all activities which were necessarily conducted by online as well as offline mode.

One of the aspects of the strategic plan is

Part A: To develop and upgrade the ICT infrastructure for effective curriculum delivery through online mechanism and

Part B: To acquaint the faculties for creation and effective delivery of e-content using ICT tools during pandemic.

HEI has already established ICT infrastructure to satisfy the academic needs of learners in the form of computer laboratories and virtual classroom. Due to pandemic the whole education in the world turn into online mode for a shorter period. During this academic year it became need of the time to conduct all the academic activities in online mechanism. In order to conduct all the classes belonging to undergraduate and postgraduate programs, the ICT infrastructure available was inadequate. Hence, as per the requirements and the decisions in the IQAC meeting, the infrastructure was upgraded in terms of the number of tools and the bandwidth of internet connectivity. The optimum utilization of all these along with virtual classroom was planned.

The training programs towards use of all these facilities, development of e-contents and their effective delivery were planned and conducted. The faculties were encouraged and promoted to participate in the training programmes on ICT organized by other institutes at national level. All the teachers have developed e-contents of the respective courses and delivered as per the schedule regularly. In addition to this, all the e-contents delivered were made available to all students through the google classrooms as well as college website. Many teachers have forwarded theses e-contents to university and they are made available for all university students by authorities through university website. While conducting all these activities the stakeholders followed all the COVID 19 protocols laid down by the different authorities from time to time.

The governing body (GB) meeting was held on **18.09.2019** with internal quality assurance cell (IQAC) of the college, the grant received under RUSA scheme for the component of infrastructure development implemented effectively and deployed. Accordingly, the block of multistory building (Two floor) entitled by 'Skills Training Center' was fully developed with necessary modern amenities in the annexure of *Vidnyan Bhavan*. In the SSC block, there is facility of lift has been made available for the staff and students specially girls, physically handicap students. There are 12 classrooms in different size with all necessaries for academic and research purposes has been developed. At the ground floor, the teacher lounge, urinary blocks etc. were developed. Fully furnished with

required internet access digital computer laboratories were developed in the first floor. The information and communication technologies (ICT) based classrooms were fabricated on the second floor. The accesses for the wash room girl's student and for the parking slot, cactus garden, botanical garden was kept *via* SSC block. Moreover, the SSC block was undergone by green audit. The facility of clean, safety drinking water block was attached with the block.
