Research Policy:

College is committed to fulfil the needs of the rural and deprived section of the society in terms of knowledge, innovations and scientific solutions through research. In order to promote the research culture among faculties and students, policies have been framed by IQAC. These policies forms guiding principles to conduct research activities at HEI. In context with this college has constituted academic research committee and maintained a research ambiance through advance research facilities. Various facilities have been established during last five years, linkages and collaborations are established and signed MoUs. The efforts made by college are noteworthy and has resulted in terms of Institutional Innovation Council (IIC, MHRD), SPPU Incubation and startup centre. Faculties have published very good number of research articles and filled 07 patents. The students have participated in AVISHKAR and Innovation competition to showcase their research ideas. So far 11 startups have resulted by the guidance of college research ecosystem.

Brief Summary of activity/ event:

Constantly increasing research and innovation demand in various fields and continuously increasing opportunities in innovation and research, for creating awareness among the students regarding research culture, we started Innovation & Start-up Cell in the college. The cell is continuously working on developing the ideas of the students relating to innovation and start-up. We have established an Institutions Innovation Council (IC201810112) in the campus as per the norms of Innovation Cell, Ministry of Education, Govt. of India and Savitribai Phule Pune University Pune, during the academic calendar year 2018-19. We have participated at Institution Innovation Council (IIC) ranking competition and received 1 Star for successful participation. We had undertaken various activities prescribed by Innovation Cell, Ministry of HRD, Govt. of India to promote Innovation and Start-up in campus continuously.

At the initial stage, for searching the interested students, we conducted a Poster Presentation competition at college level. Many students participated in the said competition. We selected few students from the participants who presented the best concepts by taking in to account their posters and their presentations. We conduct expert guidance sessions on research and innovation to the selected students at regular intervals.

As we know, bamboo is one of the hard, durable and useful wood, hence we had organized a workshop to make various useful homemade tools from bamboo keeping in mind the need of people in rural areas. Bamboo products are eco-friendly and disposable. Many students of the college participated in this workshop and completed the training of making bamboo products. Some of the students mentioned that because of this workshop, they have made and sold various products from bamboo.

We also organized a Paper Bag Making workshop from waste paper in the college keeping in mind the ban on plastic. We used waste paper from the college for this purpose. Supriya Mandalik from Aadhar NGO was present as the main guide for the said workshop. In this two-day workshop, she trained the students and made paper bags of various sizes from them. We sold these paper bags in the local market. Some bags are purchased by college staff for their personal use.

Increasing demand of Solar related product, students from Renewable Energy department of the college have developed Solar Home Light product for focusing of rural area. Under this product the solar panel of 10 watt is used for charging the battery of 7 ah , 3 bulb of 7 watt each is used in this system. The system is also providing the mobile charging facility. This product is affordable and comfortable for especially rural area.

Onion is one of the important crops in Parner tehsil and nearby areas. Farmers produce large quantities of onion, onion is one of the perishable items, hence farmers are selling it urgently in Krushi Utpann Bajar Samiti. It was found that, if the farmers store onions and send them to the market for sale as per the increase in the market price, the farmers will benefit from the increased price. Hence, the students of college had made an onion shed (Small Storage House) to store onions. Very simple idea and design used in this shed. It is kept in college incubation center; number of farmers has visited to the college for taking the idea for preparation of such types of onion shed. This design is become very popular in Parner tehsil and nearby area.

We are continuously organizing the lecture series and other activities for crating awareness among the students relating to Innovation, Incubation and Startup.

Outcome of Activity/ event:

1. It helped the students to understand what exactly research and innovation is?
2. Awareness relating to research and innovation were developed among the students.
