According to curriculum of S.Y.B.Sc. Chemistry with course code CH-303 department of chemistry had been offered the student's projects. Student performing project can be exempted from 3 experiments from two semesters and project will be evaluated by external examiner. Project being choice based activity; student will not get any exemption in external examination. The main aim of the project is experiential learning and exposure of student to routine lab technique as well as skill enhancement in practical work in the chemical laboratory. Department had given the project to 122 S.Y.B.Sc. Students in the academic year 2021-22. All students are successfully completed the project and assessment had been done by examiner at the time of practical examination.

Outcome of Activity/ event:

1. Verify theoretical principles experimentally
2. Interpret the experimental data on the basis of theoretical principles.
3. Understand systematic methods of identification of substance by chemical methods
4. Set up the apparatus / prepare the solutions - properly for the designed experiments.
5. Systematic working skill in laboratory will be imparted in student.
6. Perform organic and inorganic synthesis and is able to follow the progress of the chemical reaction by suitable method (colour change, ppt. formation, TLC)
